Other Tips for Using One iPad in the Classroom:

**Classroom Management Ideas**

- In elementary classrooms, use timers to help facilitate turn taking. Just don’t let students look for a new app when it is their turn. The sands of time move quickly...

- Work in pairs or small groups taking turns at "pressing the buttons" (or whatever else is required in the app)

- Headphones make the iPad a good deal less distracting for those that don’t have it, and more involving for those that do have it! Headphone splitters mean more than one student can listen at once.

- When working in small groups – assign roles to the group members (time keeper, iPad user, task master, etc) and rotate these roles so everyone gets a turn
Lesson Integration Ideas

- Use the iPad to differentiate. Extend your more able learners, or give your struggling learners more reinforcement.

- Schedule 1 on 1 time for students with the iPad. Shared time helps get everyone involved, but as with real life, 1 on 1 time is important too. You could even break out the digital timers here.

- Use the iPad as a Listening Center or as part of your free reading time. There are many good, free books in the iBooks Store that could be used in your classroom during this time. Many have read aloud audio.

- Find apps suitable for small group instruction. You as the teacher can lead the small group, demonstrate the skill with the app, and involve students in the learning process.

- Project your iPad. Use Apple TV, Reflection or AirServer to project your iPad on the big screen for the whole class to see. Teach from the iPad. Have students take turns to interact with it like you would with an Interactive Whiteboard.

- Work on Collaborative Stories. Several students can work on a story at one time, so you don’t need one iPad for every student in this kind of scenario. Assign roles and rotate students through them.

- Make fluency assessments – Record students reading with an audio app, or with the built-in video camera, and let them hear themselves back. Pair them as reading buddies to take turns reading and recording.

- Make rubrics and save as a pdf – open in Notability to annotate so the teacher can keep running records of students they conference with or work 1:1 with for reading or other activities.

- Create a QR Code Scavenger Hunt. Have students complete the hunt in small groups, taking turn to scan the QR code and search for the information.

- Screencast! Use apps like Educreations, ShowMe or Doceri to record screencasts of group projects, science investigations, math concepts, and more.

- Create Movie Trailers with iMovie – A great collaborative experience where students get to plan, act, and shoot their own movie trailer! Link to stories in Language Arts, historical events in Social Studies, school events, field trips, etc.

- Capture Text/Worksheets – Use the camera to capture text from a book, worksheet or self created graphic organizer and write or annotate it in Skitch or Notability.
Bloom's Taxonomy for iPads

Creating
- Audioboo
- iMovie
- ComicBook!
- ReelDirector
- SonicPics
- Animoto
- Puppet Pals
- Toontastic
- Doink

Evaluating
- HootSuite
